

STREET KART

upgrade pack 2

user manual

What you need:

Filament	PLA / PC CF		
Hardware	M1.6x6mm	9x	link
	M2.0x2mm grub screw	3x	link

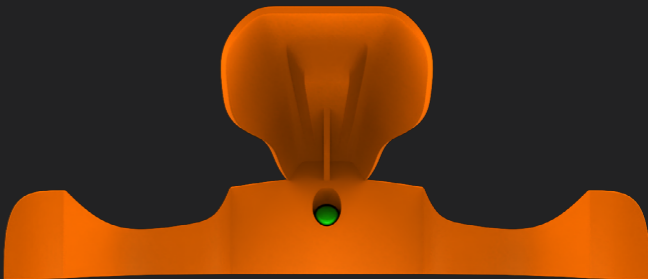

List of changes

- racing bodywork
- lower plate with bodywork mount system
- rear hubs and axle gear uses M2 grub screws - better look
- upper plate with slightly different shape
- narrower gears - less friction
- printed M2 hex tool
- small shape changes on parts for easier printing

Street kart assembly - upgrade pack 2

1.
Assembly is the same as described in street kart user manual, only with new lower and upper plate and bodywork parts.

Secure both front bodywork parts with M1.6x6mm screw.

2.
Secure bodywork parts to the lower plate with two M1.6x6mm screws on each part.
